Summary:

High Quality Content by WIKIPEDIA articles! In computing, the FC-HBA API (also called the SNIA Common HBA API) is an Application Programming Interface for Host Bus Adapters connecting computers to hard disks via a Fibre Channel network. It was developed by the Storage Networking Industry Association and published by the T11.5 committee of INCITS. An "early implementers version" was published in 2000, and the current version was completed in 2002.
